

## **Bristol Stool Chart**

Since it can be hard to state what is normal and what is abnormal, some health professionals use a scale to classify the type of stool passed. This helps assess how long the stool has spent in the bowel.

Type 1 has spent the longest time in the bowel and type 7 the least time. A normal stool should be a type 3 or 4, and depending on the normal bowel habits of the individual, should be passed once every one to three days.

Туре 1	• • • •	Separate hard lumps, like nuts (hard to pass)
Туре 2	66669	Sausage shaped but lumpy
Туре 3	Contraction of the	Like a sausage but with cracks on the surface
Туре 4		Like a sausage or snake, smooth and soft
Туре 5		Soft blobs with clear cut edges (passed easily)
Туре б	and the second	Fluffy pieces with ragged edges, a mushy stool
Туре 7	S.B	Watery, no solid pieces, entirely liquid
