

Public Health Nutrition Team

Our Vision

Our vision is that everyone throughout all communities within Forth Valley have equal, dignified access to sustainable food and resources to achieve optimal health and well being. Ensuring all communities overcome barriers to good health and equip them with tools and skills to reduce health inequalities.

Our Mission Statement

Our mission is to enable those who experience the greatest inequalities from poverty and food insecurity to make informed and sustainable food choices. We support communities by connecting and engaging people through building strong partnerships. To achieve this; we develop opportunities and training to support sustainable community assets around food, growing and health. This helps increase knowledge, skills and confidence about food, cooking, health and the environment.
