

3M™ Cavityon™ No Sting Barrier Film

Incontinence Skin Care Instructions

3M™ CAVILON™ NO STING BARRIER FILM

Incontinence Skin Care Instructions

Step 1

Gather supplies:

- A pH-balanced skin cleanser, such as 3M™ Cavilon™ No-Rinse Skin Cleanser
- 3M™ Cavilon™ No Sting Barrier Film
- Absorbent product (e.g., brief or pad)
- Soft cloth(s)
- Gloves

Step 2

Remove soiled brief or pad.

Step 3

Cleanse and dry skin.

Moisten cloth with skin cleanser.

Spray skin with cleanser, then wipe skin with moistened cloth to remove soil. Repeat as needed until skin is clean. Rinsing is not required for Cavilon No-Rinse Skin Cleanser. If using other skin cleansers, for best results, rinse completely with water and dry thoroughly.

Make sure skin is clean and dry before going to Step 4.

Step 4

Apply Cavilon No Sting Barrier Film beginning at anal area.

Apply an even coating of film while moving outward over buttocks and other areas of exposure such as external genitalia or groin folds. Let film dry completely (approximately 30 seconds). If an area is missed, reapply to that area only after the first application of film has dried. Hold skin folds apart until completely dry.

Reapply every 24 to 72 hours. Apply more often if:

- Skin becomes red or
- Incontinence worsens (e.g., increased frequency and/or liquid stools)

Avoid applying the film more than every 12 hours.

Step 5

Apply a clean absorbent product.

Step 6

Document Care:

Report redness that does not improve. Consider influence of friction or pressure if area is over a bony prominence.

Document care per facility protocol.

Ordering Information

Catalog No.	Product	NDC/NHRC No.	Size	Items/Box	Boxes/Case	HCPCS Code
3343	3M™ Cavilon™ No Sting Barrier Film	8333-3343-01	1.0mL wand	25	4	A6250
