

Moisture Pathway for Peri-tube Exudate

Gastrostomy/Jejunostomy Tube

General criteria

- Nutritional assessment (must)
- Hygiene
- Allergies
- Previous skin integrity
- Risk assessment
- Pain assessment
- Mobility
- Exclude pressure damage as a cause

Barrier products can reduce
erythema by protecting the skin
which may help to reduce pain
and discomfort.

Skin intact – Think aSSKING

Skin, Surface, Keep moving, Incontinence, Nutrition and hydration

A barrier product can be applied to intact and broken skin
but only barrier cream will moisturise the skin.

Implement patient-centred care

- Consent obtained for photos
- Control symptoms and treat underlying cause
- Educate care/patient on management
- Moisturise and protect using appropriate 3M™ Cavilon™ Skin Solution
- Involve multidisciplinary team
- Remove and irritants from skin and protect from any further exposure cleanse skin with non-soap substitute – Prontosan Solution or foam cleanser
- Consider pressure prevention and equipment
- Check skin folds for residual faeces or urine

If appropriate then consider an appropriate dressing.

Peri-tube exudate gastrostomy and jejunostomy tubes

Peri-tube site dermatitis

Excoriation caused by gastric leakage. Erythema and inflammation of skin around wound edge may show stripping or erosion.

- Follow the FV wound exudate pathway
- Consider possible wound infection/fungal infection, please see 'Scottish Roper Ladder for Wound Infection'
- Protect periwound from further breakdown by following '3M MASD Decision Making Tool'

Suggested treatment

MILD – 3M™ Cavilon™ Durable Barrier Cream

MODERATE – 3M™ Cavilon™ No Sting Barrier Film

SEVERE – 3M™ Cavilon™ Advanced Skin Protectant

Gastrostomy and Jejunostomy Tube Site Care Pathway

This pathway is for patients/residents at risk or with existing skin damage of excoriation due to gastric leakage.

	Clinical presentation	Cleansing the skin	Apply a skin protectant	When to use	How much to use
Prevention	 <p>Healthy intact skin No redness present</p>	 <p>Use a pH balanced soap substitute or non perfumed soap as available</p>	<p>Cleanse and observe skin regularly</p>  <p>3M™ Cavilon™ Durable Barrier Cream</p>	<p>Cleanse and observe skin regularly</p>  <p>Apply morning and evening</p>	<p>Cleanse and observe skin regularly</p>  <p>Apply Cavilon Durable Barrier Cream in pea-sized amounts and apply a thin even layer</p>
Management	 <p>Mild moisture associated dermatitis Redness of skin but no broken areas</p>	 <p>Warm water DO NOT USE SENSET FOAM WITH CAVILON ADVANCED</p>	<p>Cleanse and observe skin regularly</p>  <p>3M™ Cavilon™ No Sting Barrier Film</p>	<p>Daily or maximum twice a day Step up to Cavilon Advanced if requires more than 2x daily</p>  <p>2x per week</p>	<p>Apply an even coat of film to the entire area to be treated</p>  <p>Apply an even coat to the entire area to be treated</p>
	 <p>Severe moisture associated dermatitis Excoriated weeping skin</p>				

Step down

Step up

Do not use any other creams or sprays with Cavilon Advanced.

Proven solutions with the power to make a positive difference.
